Just imagine your perfect car, we'll do the rest

- Aesthetic transformation:
 - New materials
 - New FUSION operating panel
 - New IMPULSE pushbutton
 - New lighting systems
- Extensive range of finishes available for operating panels, walls, flooring and ceilings
- Use of 100% recyclable material: minimum environmental impact
- Advantages for users: less noise inside the car, more space and interaction thanks to the LCD and TFT display
- With our 3D design tools, as MP Deby, design your cabin wherever and whenever you want.

10000

Car design and building design a perfect fit

A car tailored to your needs

At MP Lifts, we want to make your life easier. That's why we provide you with all the tools necessary for the design of your car to be a perfect fit with the design of your building. No more restrictions, no more looking through lots of options and models which don't fit in with your designs.

Now all you have to do is choose a car range and then design your car. You can choose from our many finishes and combine them as you want.

The car of your imagination, within your reach

MP DEBY

Design yourself to get the aesthetics you need

Much more than a configurator

It is much more than a configurator because it not only makes possible to design and quote lifts online and immediately, but also, since it is integrated with the manufacturing processes, it allows to shorten the lead time and improve the quality.

MP wants to continue investing in digital transformation to improve processes, products and services, and our relationship with our customers.

Design your own car. Configure it à la carte. Visualise it immediately.

The Revolution of Ecodesign

NATURALLY tailored to all styles

Life-cycle assessment, applying ISO standards 14040-14044

200

Minimum environmental impact

Use of 100% recyclable material

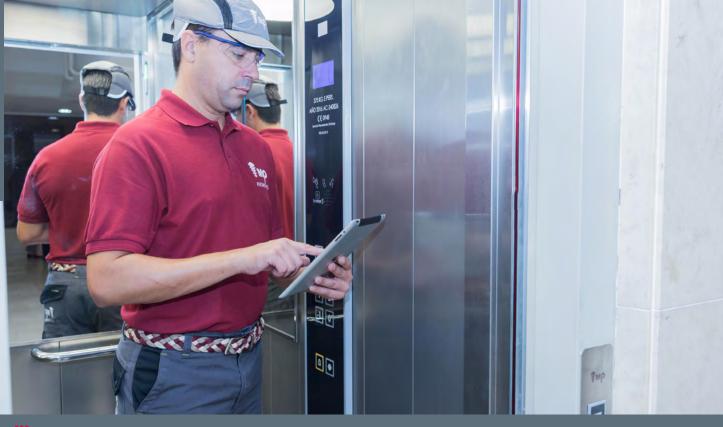

We have used the most up-to-date ECODESIGN methods available on the market for the new MP CARevolution passenger car, right from the conceptual design phase.

For this purpose, a rigorous and detailed life-cycle assessment has been done, applying ISO standards 14040-14044.

The result of this process is a product with minimal environmental impact, guaranteed by the use of more environment-friendly and are 100% recyclable raw materials, the optimisation and simplification of manufacturing processes, the application of highly efficient lighting and signalling technologies and the significant optimisation of the weight itself. All this directly contributes to reducing the energy consumption of the lift throughout its service life. As such, it is reflected in the environmental product declaration issued in accordance with the specific requirements for lifts under C-PCR-008 and EN 15814:2012+A2.

Eco-efficient design tailored to your needs.

Assembly and maintenance made easier

FLOORING

Greater regulation during construction, meaning adaptation to any lift shaft.

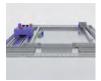

Hinged **OPERATING PANEL** which can be easily accessed for maintenance work.

LED LIGHTING with a two-year guaranteed service life, meaning less maintenance work.

WALL PANELS Optimisation of assembly times thanks to a reduction in weight and to new fixtures.

Integration with **MP ecoGO CONTROLLER.** Pre-wired and with plug, making connecting the lighting easier.

Countless advantages for users

LESS NOISE inside the car thanks to vibroacoustic car wall panels.

OPTIMISATION OF THE USEFUL HEIGHT INSIDE THE CAR thanks to new lighting concepts.

LESS NOISE inside the car, meaning greater comfort.

MORE INFORMATION FOR USERS thanks to the TFT display.

OPTIMISATION OF THE CAR'S USEFUL AREA. Reduction in the thickness of walls.
